In Memoriam

Debbie Ann Hall

October 5, 1957—March 12, 1976

The yearbook staff wishes to dedicate this page to the memory of Debbie Ann Hall, a 1976 Chico High senior, who was killed in an automobile accident on March 12, 1976.

Debbie was liked by everyone because of her friendliness and sincerity.

While attending Chico High, Debbie was a member of the F.H.A. and band, serving her senior year as band president. During her junior year, she received the John Philip Sousa Band Award. Her sophomore year she was homecoming queen candidate. The school and community called upon Debbie many times because of her outstanding art abilities. Much of her art work is still displayed at Chico High School.

On behalf of Debbie's many friends here at Chico High, the 1975-76 Dragon staff wishes to make this small tribute in memory of her.

"What's the status of TP&L's nuclear power plant?"

A. Construction of the Comanche Peak Steam Electric Station was begun in late 1974 at a site about five miles north of Glen Rose in Somervell County.

Q. "How much land area will be involved?"

A. Approximately 8,500 acres. This will include a 3,200-acre lake adjoining the plant which will provide cooling water for the plant.

Q. "When will TP&L customers start getting electric power from the plant?"

A. The first of two 1,150,000-kilowatt units is scheduled to go into operation in 1980 and the second in 1982.

Q. "Why is a nuclear plant necessary?"

A. Rising costs and a shortage of future supplies of natural gas and oil compel use of more economical and readily available fuels for generating plants. Within the next five years, TP&L will steadily reduce its dependency on gas and oil with plants designed and constructed to burn lignite-coal. While it is anticipated that lignite will continue to be an important fuel well beyond the year 2000, the long-range solution to fuel problems appears to lie in nuclear generating plants.
